

One Lamp. Three Colors.

## Tri-Spectrum Technology

Choose the right light.

With the touch of a button, the "Tri-Spectrum Technology" allows you to choose between warm, natural and cool white colors, making it the ideal lighting solution for any task.

Warm White  
[2800K]

**Calming activities.**  
Reading, accent,  
general purpose.

Pure White  
[4000K]

**Productivity.**  
Arts, crafts,  
working with color

Cool White  
[5500K]

**Late night projects  
and tired eyes.**

**True Colors  
At Your Fingertips.**

Check your colors under natural light with Stella's Tri-Spectrum Technology.

10W

50,000+ hour  
lamp life

## Lifespan

Industry standard for LED technology is that after 50,000+ hours of use, LEDs will still produce 70% of their original light output. **Translation:** If you were to use Stella for 12 hours a day, 365 days a year, you would still have 70% of the light you started with after 11 years!

## Flex Arm Technology

Stella's Flex Arm Technology lets you put the light you need exactly where you need it.

### Less Heat!

LEDs produce very little heat, making them very comfortable to work under!

### No bulb? No worries.

Stella's long lasting LED technology eliminates the hassle and cost of bulb replacement.
