TABLE LAMP

This first-to-market colour changing assessment lamp is designed to be used by opticians/occupational therapists and provides 3 distinct colour assessment temperatures which offer ideal lighting for healthy vision depending on the person's eye condition. The assessment lighting colour temperatures are as follows:

- 2,700°K: low contrast and lowest glare. Ideal for people who are extremely sensitive to bright white light.
- 4,000°K: medium contrast and low glare. Ideal for people who are looking for good contrast and are also sensitive to bright white light.
- 6,500°K: high contrast and medium glare. Ideal for people who are looking for high contrast and are not sensitive to bright white light.
