

MULTILIGHT Pro

Light colour in a striking design

MULTILIGHT Pro

Best lighting for best vision

The innovative MULTILIGHT Pro low vision lamp series by SCHWEIZER has been developed with the needs of visually impaired people in mind and features numerous impressive details.

Sophisticated technology and maximum durability thanks to selected materials combined with an elegant design and intelligent functionality:
MADE IN GERMANY

Table lamp with rechargeable battery and 3 light temperatures

Table lamp with rechargeable battery in one individual light temperature of choice

Table lamp mains operated in one individual light temperature of choice

Functionality and design that delight

Designed for visually impaired people, the MULTILIGHT Pro LED lamp series features numerous innovative ideas.

Design

- 7 different product versions for multiple applications
- Black matte surface prevents irritating reflections
- Robust plastic housing facilitates cleaning
- Elegant and timeless design

Functionality

- Large central control panel in contrasting colour for easy one-touch operation
- Audible ON/OFF feedback
- Flexible positioning of lamp ensures optimal lighting while minimising glare
- Maximum user comfort thanks to large, easy-to-operate locking levers
- Available in 3 light temperatures (warm white – 2700 K, neutral white – 4500 K and cool white – 6500 K)
- Lamp head can be swivelled in any direction and even pulled right down to the table top
- Recessed connector socket and round barrel connector facilitate plug-in
- Foldable design for space-saving storage; standard arm versions also ideal for mobile use

Technology

- Low energy consumption and high performance
- Features the tried and tested LEDs of SCHWEIZER's illuminated magnifiers – no mixing of light temperatures
- 2 brightness levels (100% and 70%) for optimal lighting
- Lithium-Ion battery with 4-hour operating time and 3-hour charging time
- Easy-to-recognise battery status
