5000 Artrodese

2300 Artrodese with triple frame

The Artrodese seat has two individual tilting front flaps to support both legs. An Artrodese chair will be beneficial to a customer with leg or hip problems. For instance:

- A knee disability where bending the knee is an issue. By using the flaps you can gradually adjust the angle and take away the pressure on the leg with the bad knee where the healthy leg can keep a 90° angle.
- Leg length discrepancy. To compensate for the difference in leg length an artrodese seat can help to lower the flap on of the shorter leg.
- Leg thrombosis. Although in the treatment of leg thrombosis there is no medical reason why a leg could not be bend in a 90° angle it can help patients to relieve the pressure on the veins to sit with their leg in a more open angle. Bending the knee is making blood circulation more difficult so the seat adjustment of the Artrodese seat is perfect for supporting the leg and allowing to have it in a far larger angle than the usual 90 or 100 °.
- A leg amputation that requires a different angle whilst seated.

Score Artrodese Line - Specifications

- Height adjustment ca. 46 – 59 cm
- Fixed or Tilt seat angle adjustment (2300), Synchromechanism (5000). Back angle and height adjustment on all models.
- Seat 2300 : total 45 x 48 cm (WxD), flaps 22 x 17 cm (WxD)
- Seat 5000 : total 50 x 53 cm (WxD), flaps 23 x 18 cm (WxD)
- Backrest dimension 2300: 41 x 37 cm (W x H), 5000: 46 x 50 cm (W x H)
- Aluminium base Ø 68 cm (2300) or Ø 70 cm (5000)
- Swivel castors Ø 5 cm (2300) or Ø 6,5 cm (5000)

OPTIONS

- Brake loaded castors
- Inflatable lumbar support
- Height and width adjustable armrests
- Headrest (only possible on 5000)
- Upholstery Trevira, Wool, Black leatherette or Stamskin

TRIPLE FRAME (for both 2300 or 5000)

- The frame has a width of 62 cm at the front and of 58 cm at the back. The depth is 55 cm. The height is 19 cm including castors Ø 10 cm
- The column is rotation locked and has an adjustment of ca. 120 mm (height adjustment ca. 45 – 58 cm). Colour is standard RAL 7035 (light grey). Including manual and foot brake
